Information Technology acceptable use agreement – children

Whilst our school promotes the use of technology, and understands the positive effects it can have on enhancing pupils' learning and community engagement, we must also ensure that they are able to use technology safely, in accordance with the PSED policy and the Computing Policy.

We achieve this through our teaching in the classroom, as part of our assembly timetable and during internet safety days. Our website signposts parents to useful resources that can support them in keeping their children safe online when using technology at home.

With support from our staff and their parents our children agree to:

	I will only use the internet when I have permission from an adult.
	I will immediately tell an adult if I see something that worries me.
	I will only use websites and apps that I have been given permission to use.
	I will not share any information about myself or others on the internet.
	I will not write or talk to other people on the internet without permission.
	I will use ipads responsibly and I will not take photos or videos without permission.
	I will respect others' work and not change or delete their files.
